Professional Summary

Computer Science graduate from Jadara University with a strong foundation in software engineering, backend development, and relational database systems. Experienced in building scalable web applications and database-driven solutions using JavaScript, PHP, SQL, Oracle SQL, and PL/SQL. Strong understanding of object-oriented programming, data structures, algorithms, and software engineering principles. Passionate about developing secure, scalable, and maintainable software while continuously expanding expertise in Oracle technologies, cloud computing, and cybersecurity. A proactive, fast-learning software engineer with excellent analytical, problem-solving, and teamwork skills, committed to delivering reliable, high-quality software solutions.

Technical Skills

Programming Languages

• C • C++ • C# • Java • JavaScript

Web Development

• HTML • CSS

Backend & Databases

• PHP • SQL • Oracle SQL • MySQL • Database Design

Version Control

• Git • GitHub

Development Tools

• Visual Studio Code • SQL Developer

Computer Science Fundamentals

• OOP • Data Structures • SDLC • Problem Solving

Projects

[AI-Based Agricultural Supply Chain Management System](#) 🔗 ,

10/2025 – 02/2026

Graduation Project (Capstone)

- Designed and developed a web-based platform connecting farmers, transporters, and store owners through a centralized supply chain management system.
- Implemented secure authentication, role-based access control, backend business logic, and a relational database architecture.
- Integrated AI-assisted decision support and price prediction features to improve operational efficiency and support data-driven decision-making.
- Applied the complete Software Development Life Cycle (SDLC), including requirements analysis, system design, implementation, testing, and documentation.
- Collaborated within a multidisciplinary team to deliver a scalable, secure, and maintainable software solution.

Technologies: PHP • JavaScript • HTML5 • CSS3 • SQL • MySQL • AI

Customer Service Mobile Application,

03/2026 – 05/2026

Field Training Project – Irbid District Electricity Company (IDECO)

- Developed a mobile application prototype to improve customer service operations during the field training program at Irbid District Electricity Company (IDECO).
 - Implemented user-friendly interfaces and application features following software engineering principles and mobile application development practices.
 - Participated in application analysis, implementation, testing, debugging, and documentation within a real-world development environment.
 - Collaborated with supervisors and team members to deliver a practical solution while strengthening problem-solving, communication, and teamwork skills.
- Technologies: Android Studio • Java • XML • SQLite

Professional Experience

Field Training Intern, Irbid District Electricity Company (IDECO)

02/2026 – 05/2026

Irbid, Jordan

- Completed a field training internship within the Information Technology Department at Irbid District Electricity Company (IDECO).
- Assisted in the design and development of a customer service mobile application as part of the training program.
- Participated in software testing, debugging, technical documentation, and software maintenance activities.
- Collaborated with supervisors and team members while applying software engineering principles in a real-world development environment.
- Strengthened practical skills in software development, problem-solving, teamwork, communication, and professional workplace practices.

Education

Bachelor of Science (B.Sc.) in Computer Science, Jadara University

10/2022 – 06/2026

Irbid, Jordan

- Graduated with an Excellent GPA (85.5/100).
- Built a strong foundation in software engineering, object-oriented programming, data structures, algorithms, database systems, web development, computer networks, operating systems, and artificial intelligence.
- Completed a capstone project focused on designing and developing an AI-based agricultural supply chain management system using modern software engineering practices.

Certificates

PCEP – Certified Entry-Level Python Programmer

Issued by: Python Institute | 05/2026

Python Essentials 1

Issued by: Cisco Networking Academy | 05/2026

Information Security & Linux Fundamentals Training (40 Hours)

Issued by: DevSec Academy | 08/2024

Web Development Training (36 Hours)

Issued by: Jadara University | 08/2024

IEEE Jordan AI Modeling Hackathon 1.0

Participant | IEEE Jordan Section | 05/2025

Droidcon Amman Conference & Hackathon

Attendee | 01/2024
