Professional Summary

Computer Science graduate from Jadara University with a strong foundation in software engineering, backend development, and relational database systems. Experienced in developing scalable web applications and database-driven solutions using JavaScript, PHP, SQL, Oracle SQL, and PL/SQL. Strong understanding of object-oriented programming, data structures, algorithms, and software engineering best practices. Passionate about designing secure, efficient, and maintainable software while continuously advancing expertise in Oracle technologies, cloud computing, and cybersecurity. A proactive and fast-learning software engineer with excellent analytical, problem-solving, and teamwork skills, dedicated to delivering reliable, high-quality software solutions.

Skills

Programming Languages:

• C • C++ • C# • Java

Web Technologies:

• HTML • CSS • JavaScript

Backend & Databases:

• PHP • SQL

Version Control:

• Git • GitHub

Development Tools:

• VS Code • SQL Developer

Operating Systems:

• Windows • Linux

Concepts:

• OOP • Data Structures • Algorithms • SDLC
• Problem Solving

Experience

Field Training Internship, 02/2026 – 05/2026

Irbid District Electricity Company (IDECO) – Irbid, Jordan

- Participated in the development of a mobile application.
- Collaborated with the development team throughout the software development lifecycle.
- Applied software engineering principles, testing, and debugging in a real-world environment.
- Strengthened problem-solving, teamwork, and communication skills.

Software Development Projects (Academic), 03/2022 to Current

Jadara University – Irbid, Jordan

- Developed full-stack web applications using HTML, CSS, JavaScript, PHP, and SQL.
- Designed and implemented responsive user interfaces and backend components.
- Built and optimized relational database schemas, SQL queries, and data management solutions.
- Applied software engineering principles throughout the Software Development Life Cycle (SDLC), including requirements analysis, system design, implementation, testing, and documentation.
- Collaborated effectively on team-based software projects using Git and GitHub for version control.
- Developed practical problem-solving skills by delivering multiple academic and training projects following software engineering best practices.

Graduation Project (Capstone)

- AI-Based Agricultural Supply Chain Management System
- Designed and developed a web-based platform connecting farmers, transporters, and store owners through a centralized management system.
- Implemented secure authentication, role-based access control, backend business logic, and a relational database.
- Integrated AI-assisted decision support and price prediction features to improve supply chain efficiency.
- Applied the complete Software Development Life Cycle (SDLC), including requirements analysis, system design, implementation, testing, and documentation.
- Collaborated within a multidisciplinary team to deliver a scalable and maintainable software solution.

Education

Bachelor of Science (B.Sc.) in Computer Science

Jadara University – Irbid, Jordan

Graduated: June 2026

Relevant Coursework:

- Data Structures and Algorithms
- Database Systems
- Software Engineering
- Web Development
- Operating Systems
- Computer Networks
- Artificial Intelligence

Academic Achievements:

- GPA: 85.50 / 100
- Degree Awarded with Excellent Honors

Languages

Arabic	English
Native or Bilingual	Professional Working

Certifications

- PCEP – Certified Entry-Level Python Programmer (Python Institute), 05/2026
- Python Essentials 1 – Cisco Networking Academy, 05/2026
- Participant, IEEE Jordan AI Modeling Hackathon 1.0 – IEEE Jordan Section, 05/2025
- Web Development Training (36 Hours) – Jadara University, 08/2024
- Information Security & Linux Fundamentals Training (40 Hours) – DevSec Academy, 08/2024
- Attendee, Droidcon Amman Conference & Hackathon, 01/2024
